Register No. : 2116240701505

Approval

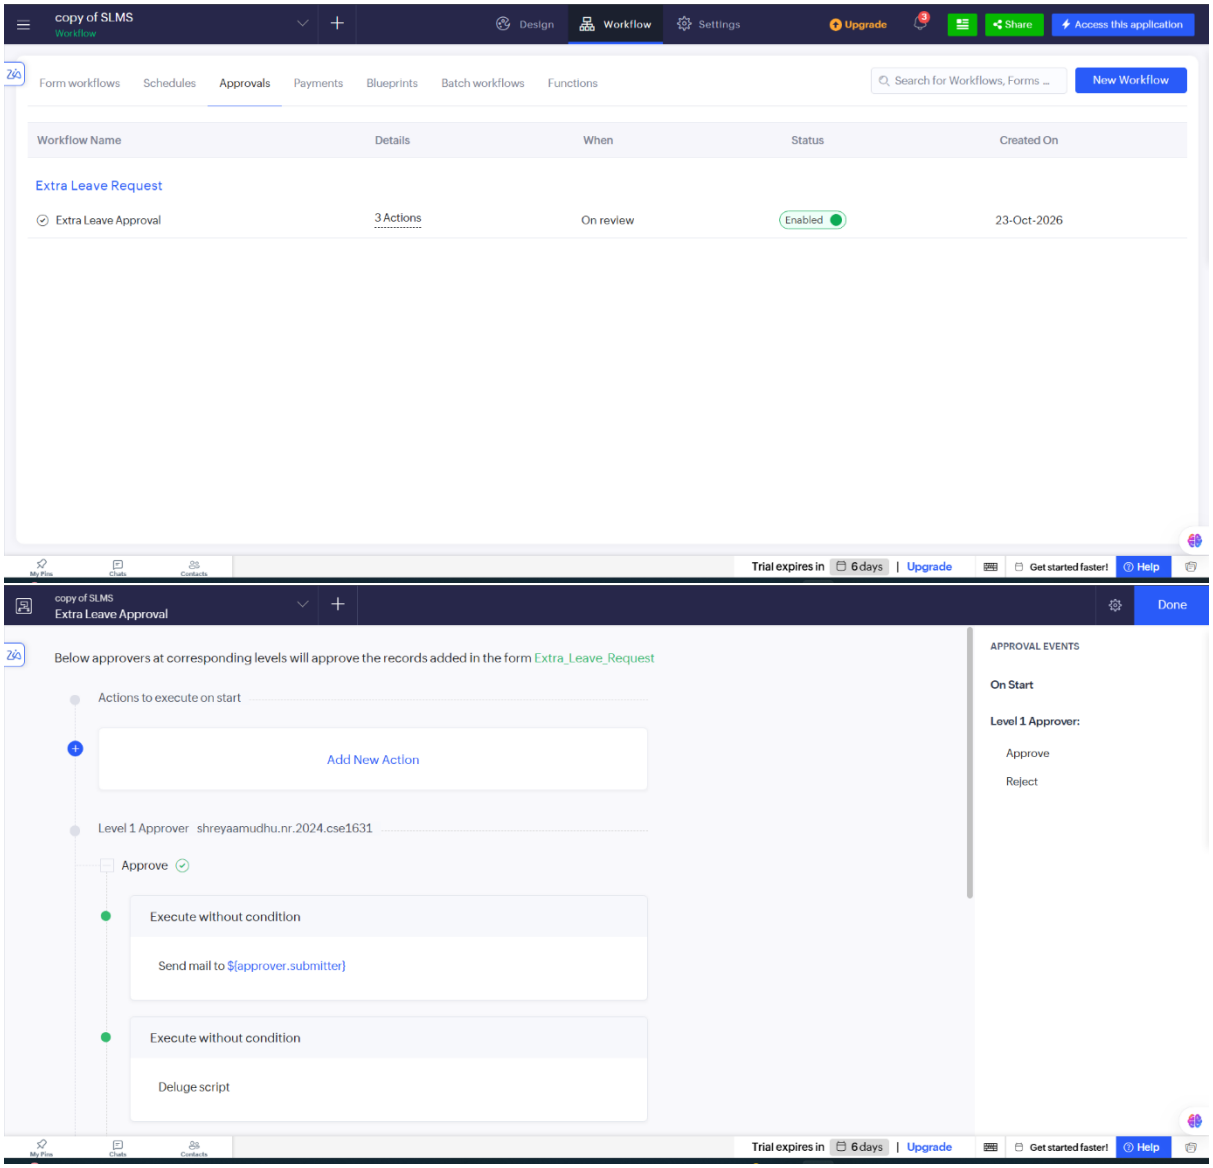

Aim

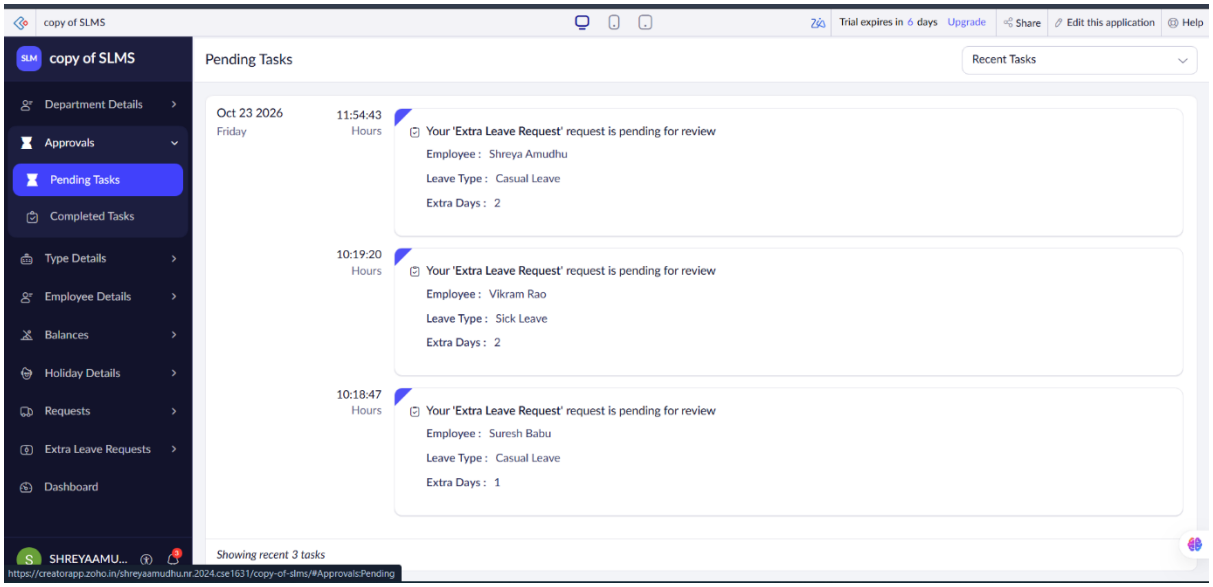

To create an approval process in Zoho Creator that sends an Extra Leave Request to the approver and automatically updates the employee's leave balance when it is approved**.**

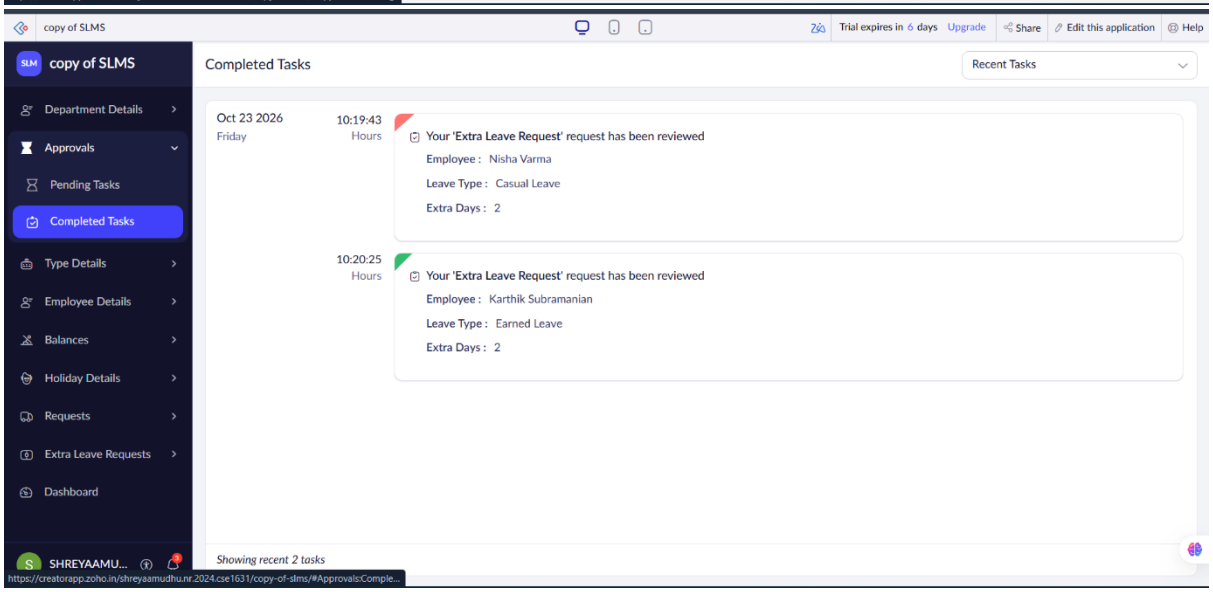

Procedure

1. Go to Workflows → Approval → Create New and name it "Extra Leave Approval".
2. Select the form Extra Leave Request (fields: Employee, Leave Type, Extra Days, Reason).
3. Under display fields, choose Employee, Leave Type, Extra Days and Reason, so the approver sees these details while reviewing.
4. Set Level 1 and choose the approver (for example the HR Admin or the employee's manager).
5. In On Approve, add two actions: send an email to the submitter saying "Your request has been approved", and run a Deluge script that finds the matching Leave_Balance record (same Employee, Leave Type and current year) and adds Extra_Days to Allocated_Days.
6. In On Reject, add an action that sends an email to the submitter saying "Your request has been rejected".
7. Save the approval process.
8. Submit an Extra Leave Request, then log in as the approver and approve one request and reject another.
9. Check the emails and confirm that Allocated_Days increased only for the approved request.

Result

The approval process was created and tested successfully. Extra Leave Requests go to the approver for review. On approval, the employee's allocated leave days are increased automatically and a confirmation email is sent. On rejection, the balance stays unchanged and a rejection email is sent.
